

Yiriwaa report 2022

The year 2022 was to try to go back to normal after two difficult corona years. As we stated in our report 2021, we see that our foundation only can reach their goals if the local contact persons are doing their work on a proper way. That time we replace three of the six contact persons. Clear guiding is necessary because we see that how closer the contact persons monitoring the Yiriwaa students, how better we can follow their development in education.

We also see a grow in continuation to tertiary education like University and College. The costs of this level of education are much more higher than the general education until grade 12. Not only a high tuition fee, but also to provide them with a laptop because without that it is not possible to follow the classes.

Also some students of tertiary level finished with good results and we are happy that they like to contribute to the Yiriwaa activities in The Gambia.

1. Amount and level of Yiriwaa Students 2022

| Level | total | boys | girls |
